Environmental Health and Safety Policy

eco | International is a leader in recycling and asset management of electronic products.

eco | International commits itself to continual pollution prevention through responsible management and environmental solutions in order to minimize the impact of obsolete electronic products.

eco | International further commits itself to providing and maintaining safe and healthful working conditions, and to follow operating procedures that will safeguard our employees.

eco | International will operate and commit to an Environmental, Health and Safety (EHS) Management system in conformance with the requirements of the ISO 14001 and OHSAS 18001 standards. This system includes setting measurable objectives and targets to its environmental aspects, implementing appropriate environmental control programs and procedures, and continually monitoring and auditing all aspects of the EHS to measure our progress and plan for continual improvement while maintaining compliance with Environmental, Health and Safety laws, regulations and any other requirements identified by the company.

It is the responsibility of everyone within our organization to strive towards continual improvement of our EHS Management Systems by supporting our EHS goals and targets and following programs and practices of responsible management of electronic products.

We continually review our policy, communicate it to our employees and is available to the public.
